Recommendation for PJ Losey

PJ worked for me for 7 years on a race team building and maintaining one off prototypes. He was our lead on all matters electrical and computer wise. He also did mechanical work.

PJ was loyal, showed up on time, worked weekends and was organized to get the job done, even at the track when time was extremely limited. He worked well with others including some prima donnas. PJ also acquired and installed my racing simulator I could count on PJ.

After I retired from racing, I felt comfortable having PJ manage the inspection, negotiations and shipping of several very, very expensive show cars.

These days it is difficult to hire competent, loyal hard working employees. No one is perfect, but unlike many, PJ strives to be perfect.

Should you wish to talk to me on this matter, my number is 775-313-8291.

Regards

Bob Davidson
